

MICHAEL BOYLE

Process and Automation Engineer

Smoker Craft, Inc

[LinkedIn Profile](#)

Michael Boyle is a dedicated Process Engineer with over seven years of experience at Smoker Craft Inc. With a passion for innovation, he has recently transitioned into the exciting field of automation and new technology. As the company's Automation Specialist, Michael is at the forefront of integrating cutting-edge technologies and processes into Smoker Craft's operations.

Michael earned his degree in Industrial Engineering Technology from Purdue University and is currently completing his associates in Smart Manufacturing and Digital Integration through IVY Tech. Embracing the challenge of expanding his skill set, he is rapidly acquiring expertise in automation, robotics, and digital integration.

In recognition of his quick adaptability and promising potential, Michael was honored to be inducted into the 2023 'Rising 30' class for advanced manufacturing. This distinction showcases his dedication to continuous learning and his commitment to driving technological advancements in the industry.

As Smoker Craft Inc.'s Automation Specialist, Michael plays a vital role in revolutionizing the company's production processes. By leveraging his expertise and keeping abreast of emerging trends, he identifies opportunities for automation, streamlines workflows, and improves operational efficiency.

Outside of his work, Michael stays actively engaged with industry forums and conferences, eager to stay at the forefront of automation and new technology. He is passionate about collaborating with fellow professionals, sharing knowledge, and contributing to the evolution of the manufacturing landscape.

With his strong foundation in industrial engineering and his newfound expertise in automation, Michael is a valuable asset to Smoker Craft Inc. and a driving force behind their pursuit of operational excellence and technological innovation.
